

Program Details

The *Hope* program is designed for children under age 19 in Australasia who have been diagnosed with a health challenge. The program runs for six months with the option of renewing every six months.

APPLICATION

Applications are available in the following formats:

- A printer friendly version of the application may be downloaded on our website.
- Paper forms are also available by contacting Endowment Australasia.

Note: Applications take approximately 3 weeks to process if sponsorship (funding) is submitted with the application.

NUTRITION

During the 6-month program, each child will receive three shipments, one every 2 months, which includes a 60 day supply of micronutrients. All products are shipped directly to the child.

- **Guidelines** (recommended products and amounts to take each day) - The child's recommended guideline of micronutrients to consume daily will be emailed to the parent and champion (if applicable) after their first shipment has been processed.

OVERSIGHT & VALIDATION

Dr. Reg McDaniel provides oversight for all of MannaRelief's programs. He has established suggested servings that will be followed in the Endowment Australasia's Hope Program.

In order to document the quality of life improvement in a child, a Progress Report is to be completed every six months. It is preferable for a parent or guardian to complete the form. This report helps us confirm the products children need for future shipments.

COST

Refer to the "Make a Donation" form located at www.endowmentaustralasia.org. For each six month program, each child needs a financial sponsor - AUD\$1000 one-time or AUD\$175 per month for six months. This may come from one source directly; from a collection of individual donations combined to total the monthly contribution; or a one time donation towards the next shipment of products. Donations may be made by cheque or credit card or direct deposit.

Please note that Endowment Australasia is unable to issue tax donation receipts at this time.

PRODUCT SHIPMENTS

Micronutrients are shipped directly to the child and arrive every two months. Please allow two weeks shipping time.

PROGRAM RENEWAL

The Hope program runs in six month increments. If a parent would like their child to continue for another six months, completed Progress Reports are required and continued financial sponsorship will be needed.

Contact Endowment Australasia for more details. The products can only be consumed by the child enrolled and cannot be sold or exchanged.
